

Environmental Studies wishes to congratulate the following Environmental Studies and Hydrologic Sciences students invited to join The UCSB Chapter of **Phi Beta Kappa** this year:

| | |
|-------------------|----------------------|
| Emma Cardoso | Hazel Johnson |
| Maya Colehower | Justinas Memenas |
| Amanda Costley | Megan Musolf |
| Dania De Ramon | Natalie Nguyen |
| Ella Fletcher | Ames Noll |
| Molly Garrett | Catrina Sada |
| Bella Genovese | Eme Schwartz-Collins |
| Samantha Gilman | Lauren Stiles |
| Georgia Goldsmith | Jake Yarris |
| Matthieu Huy | |

Established in 1776, the Phi Beta Kappa Society is the nation's oldest and most respected scholastic organization in North America. Its purpose is to honor high achievement across the classic liberal arts—in the humanities and fine arts, in the social sciences, and in mathematics, life, and physical sciences. We embrace and we encourage a broad liberal arts education, and we welcome new members who've demonstrated intellectual curiosity and academic excellence across a wide range of fields and disciplines.

The UCSB chapter, California Lambda, was established in 1967 and it has maintained a high standard of admission. Election is by invitation only, and we only elect about one percent of graduating seniors each year. A small number of juniors are invited each year. More information is on the [UCSB Chapter of Phi Beta Kappa webpage](#).
